

GP letter

Date: 15 February 2026

To Whom It May Concern

Dear Sir/Madam,

Re: Michael Thompson

DOB: 14/06/1965 (fictional)

This letter is regarding the above-named patient and is intended to provide information regarding his medical conditions and the medications currently prescribed to him.

Mr Thompson suffers from a number of long-term health conditions, including chronic back pain, osteoarthritis affecting his hands, knees and shoulders, ischaemic heart disease following a previous heart attack, depression and anxiety.

He experiences ongoing chronic musculoskeletal pain which has progressively worsened over time. He reports significant discomfort affecting his mobility and manual dexterity, particularly due to osteoarthritis in his hands and knees. To help manage his pain symptoms, he is prescribed Co-codamol and Naproxen. As he takes anti-inflammatory medication regularly, he is also prescribed Lansoprazole for gastric protection.

Mr Thompson has a history of ischaemic heart disease and continues to experience intermittent angina symptoms. He is prescribed GTN spray for symptomatic relief as required together with long-term cardiac medications including Isosorbide Mononitrate, Atenolol, Aspirin and Atorvastatin.

Mr Thompson also suffers from depression and anxiety. His mental health symptoms have increased in recent years and his Sertraline dosage has been increased to 100mg daily. During periods of poor mental health he has reported suicidal thoughts; however, there has been no reported current intent or active plans of self-harm. His condition continues to be monitored within primary care.

In addition to his physical symptoms, Mr Thompson reports reduced confidence when attending unfamiliar places, increased anxiety in social situations and reliance upon support from his partner with some day-to-day activities and medication management.

Mr Thompson was admitted to hospital during the previous year following an episode of chest pain. Investigations were undertaken and his cardiac treatment was subsequently reviewed.

If you require any further information, please do not hesitate to contact the surgery.

Yours faithfully,

Dr Sarah Williams
